

MILENCO

2776 Aluminium Leveller

THINK READ PLAN

This Aluminium Leveller is designed for use with both caravans and motor-homes (13" - 16" wheels) It is made from lightweight aluminium and comes complete with an extra strong 15mm bar and ratchet (comes complete with carry case)

Approximate Dimensions: 20cm High x 24.5cm Width x 81cm Length

Maximum lift height: This is variable subject to wheel size, ground condition, vehicle weight, suspension compression, tyre deflection, etc. Approximately 15cm

Because of tyre compression and suspension compression, should you wish to measure the lift, we recommend to measure from the ground to the caravan wheel arch.

1. Remove leveller from bag.

2. Drop screw bar into socket

3. Slide Aluminium Leveller underneath caravan wheel. Centre pads on tyre.

4. Use ratchet to adjust the leveller to desired height.

(can lift 1000kg per wheel)
